SMART CAMPUS MANAGEMENT SYSTEM - PROJECT ARCHITECTURE OVERVIEW

Lead Outgoing Developer: Rahul (Department of Computer Engineering)
Project Status: Active Integration Sprint 4 | Stage: Pre-Release Handover

1. System Purpose & Scope:

The Smart Campus Management System unifies student authentication, course enrollments, automated campus fees collection, and administrative operations into a single secure platform.

2. Implemented Modules:

• Student & Staff Authentication Module: Fully completed using FastAPI JWT bearer tokens, bcrypt password hashing, and role-based permissions.
• Core PostgreSQL/SQLite schema migrations: User profiles, campus departments, and access tiers completed.

3. In-Progress & Blocked Components:

• Payment Gateway API: Incomplete. Webhook verification logic is drafted, but live gateway sandbox credentials are still awaited from the finance office.
• Password Reset Feature: Pending frontend modal connection and SMTP mail service credentials.
